

"But, Dr., it says in my biology book that my thyroid and pituitary are useless organs. So they need to come out."

"Until we find something better, the best proof of evolution is the useless organs in our body."

"We could only have descended from rabbits, African apes, Australian wombats, or American opossums, for they are the only other ones with appendixes."

"We're looking for volunteers that we can operate on and remove all their 200 useless vestigial organs."
