

"Since ball bearings obviously evolved from BBs, truck wheels must have descended from air rifles."

"But, prof, if people have a chicken's yolk sac, lizard's tail, and fish's gill slits,—then why do the chickens, lizards, and fish have them too? Did they all evolve from one another?"

"But prof, I heard that those charts of Haeckel's were fakes and disproved by scientists decades ago."

"The hearts of our ancestors had 1, then 2, then 3, and finally 4 chambers."

"But prof, if recapitulation is true, then why does the human fetal heart have 2, then 1, then 4 chambers?"
