

## MORE HAECKEL FRAUDS

On the left below, is \*Haeckel's drawing of a dog embryo and human embryo, each in the fourth week. For this, he drew a picture of a human embryo, and then drew a very slightly changed one for the dog.

On the right below, is what they really look like. On the left is an original drawing of a dog embryo (4th week) taken from Bischoff. On the right is an original drawing of a human embryo (4th week) taken from Ecker.
