

STILL MORE FRAUDS

On the left. *Haeckel made a woodcut of an ova, then had it printed three times, but with three different labels (dog, monkey, and man).

On the right. Haeckel prepared a woodcut of an embryo, then had it printed three times, each time with a different title below it: dog, chicken, and tortoise. Haeckel recognized it would take scheming and trickery to come up with evidence for a theory without evidence.
